

To prevent brain injury and to enhance the lives of those affected by brain injury

The Brain Injury Association of Rhode Island (BIARI) is a statewide nonprofit organization dedicated to providing support, education, advocacy, research and prevention. Whether you are a person with a brain injury, a family member or friend of someone affected by brain injury, a professional working in the field, or an interested member of the general public, the Brain Injury Association of Rhode Island is here to be of service to you.

The mission of BIARI is to prevent brain injury and to enhance the lives of those affected by brain injury. Our membership includes brain injury survivors, their families and friends, health-care professionals, physicians, providers of brain injury care and rehabilitation, and other advocates.

BIARI was founded in 1983 by families of persons with brain injuries. It grew out of an overwhelming need for appropriate services and support to brain injury survivors.

We are a membership organization working to expand services in Rhode Island for the care and rehabilitation of individuals who have sustained brain injuries. Our efforts include increasing the public's awareness of traumatic brain injury and its consequences, prevention and safety education, developing support systems, encouraging appropriate rehabilitation and services for survivors of brain injury and disseminating information about brain injury. The Association actively collaborates with state and private entities to educate survivors, family members and professionals on all aspects of brain injury prevention, treatment and support needs. The BIA of RI operates a Brain Injury Resource Center to improve access to information on brain injury, and to enhance the effectiveness of agencies and service providers who work with survivors of brain injury.

Join Us and help bring a lifetime of hope and opportunity to brain injury families through education and information for all Rhode Islanders.
